Professional Summary

DevOps and cloud engineer with hands-on experience in production infrastructure, observability, back-end services, and automation for AI media platforms. Experienced in AWS and GCP environments, GPU-backed workloads, CI/CD delivery, and custom autoscaling for long-running GenAI pipelines. Conducts AWS and DevOps workshops for students and corporate teams.

Core Technologies

AWS, GCP, Docker, Docker Compose, FastAPI, Flask, Prometheus, Grafana, Loki, Jenkins, HashiCorp Vault, Redis, SonarQube, Selenium, Boto3, ELK Stack, Python

Working Experience

Neural Garage Pvt Ltd

2022/12 – Present

DevOps Engineer - II

2025/04 – Present

DevOps Engineer

2022/12 – 2025/04

- Sole DevOps engineer within the company, responsible for overseeing all DevOps operations and managing client interactions.
- Single-handedly oversaw infrastructure requirements and implemented them for development and research teams.
- Accountable for executing comprehensive security checks across cloud-based and on-premises servers.
- Implemented and currently maintain a VPN network connecting servers across AWS, GCP, and on-premises environments.
- Developed and maintained pipelines to automate multiple aspects of deployment.
- Established a comprehensive monitoring and alerting system for all services and security protocols, enabling proactive detection of issues and vulnerabilities.
- Developed customized Grafana metric dashboards for efficient data visualization for both administrative teams and developers.
- Managed a cluster of GPU-enabled servers and spearheaded the design of the overall network architecture.
- Developed and currently maintain custom scripts for provisioning and managing cloud infrastructure.
- Collaborated with the backend development team to design and develop Python FastAPI services for product offerings.
- Developing Python packages to streamline project initialization and deployment while abstracting project architecture complexities.

Gemini Solutions Pvt Ltd

2021/09 – 2022/11

Software Engineer

- Resolved batch job errors, debugged application issues, and addressed platform-related glitches.
- Managed and resolved client-reported issues and bugs promptly and effectively.
- Engaged with clients on behalf of project owners.

- Drafted documentation outlining debugging methods and approaches for effective reference and reuse.
- Performed root-cause analysis to identify and resolve blockers.

Teqstories Solutions Pvt Ltd

2021/04 – 2021/09

Associate System Engineer Trainee

- Created software solutions for both internal and external clients.
- Managed application deployment and monitoring across cloud platforms.
- Provided mentorship to interns and conducted corporate training sessions.
- Engaged with clients to gather project requirements.

Selected Projects

VisualDub

- AI dubbing platform delivered as SaaS and API offerings.
- Owned end-to-end deployment, CI/CD, and production monitoring automation.

Beacon.Io

- Unified data and analytics platform for capital market risk workflows.
- Responsible for reliability, pipeline debugging, and production user support.

Automation and DevOps Tooling

- Built infrastructure automation with AWS SSM, Boto3, Docker Compose, Jenkins pipelines, and internal monitoring tooling.

Education

Master of Computer Application

2021

APJ Abdul Kalam Technological University (CGPA: 8.33)

Bachelor of Computer Applications

2019

Kerala University (CGPA: 7.28)

Certifications

- AWS Certified Cloud Practitioner
- AWS Cloud Technical Essentials
- Programming for Everybody (Getting Started with Python)
- AWS S3 Basics
