Professional Summary

Bangalore-based DevOps and cloud engineer with 5+ years of experience delivering production infrastructure, observability, backend services and automation for AI media platforms. I work primarily with AWS and GCP, build scalable monitoring systems, run GPU-backed workloads, and deliver resilient deployments with custom autoscaling for long-running GenAI pipelines. I was also the point of contact for implementing SOC 2 compliance across infrastructure and operations workflows.

Education

Master of Computer Application

Tkm College of Engineering, Kollam

Kollam, Kerala

Aug. '19 – May '21

Bachelor of Computer Applications

UIT Mukhathala, Kollam

Kollam, Kerala

Jun. '16 – Apr '19

Technical Skills

Languages	Python, Bash/Shell Scripting, SQL, HTML, CSS
Cloud	AWS, Google Cloud Platform (GCP)
Tools	Docker, Kubernetes, Jenkins, Terraform, Linux, Git, Nginx, Prometheus, Grafana
Concepts	CI/CD, DevOps, MLOps, Microservices, Agile

Experience

DevOps Engineer II | *Full-time*

NeuralGarage Pvt Ltd

March 2025 – Present

Bangalore

- Sole owner of the organization's cloud infrastructure, platform operations, security initiatives, and DevOps strategy.
- Designed and managed multi-cloud infrastructure across AWS, GCP, and on-premises environments supporting AI/ML product development and production workloads.
- Led infrastructure architecture, network design, and GPU cluster management for research and production environments.
- Established and maintained organization-wide monitoring, alerting, observability, and security monitoring frameworks.
- Directed SOC 2 compliance initiatives, implementing security controls, access management policies, and operational governance procedures.
- Evaluated cloud providers, infrastructure services, and third-party vendors to optimize scalability, reliability, and operational costs.
- Managed client-facing technical discussions and coordinated outsourced teams responsible for quality assurance and operational processes.
- Collaborated with engineering leadership to define infrastructure roadmaps, deployment standards, and platform reliability objectives.

DevOps Engineer | *Full-time*

NeuralGarage

Dec 2022 – Mar 2025

Bangalore

- Designed and maintained CI/CD pipelines, automating application deployment, infrastructure provisioning, and release workflows across development, staging, and production environments.
- Implemented and managed cloud infrastructure across AWS and GCP environments supporting multiple products and internal services.
- Built and maintained secure VPN connectivity between cloud and on-premises environments to support distributed infrastructure operations.
- Developed custom automation tools and infrastructure management scripts to streamline provisioning, deployment, monitoring, and operational workflows.
- Designed and maintained Grafana dashboards, monitoring systems, and alerting frameworks providing visibility into application and infrastructure health.
- Performed infrastructure security assessments, server hardening, access control management, and operational maintenance activities.
- Managed GPU-enabled compute environments and supported infrastructure requirements for machine learning and AI workloads.

- Collaborated with backend engineering teams in developing FastAPI-based services and internal platform tooling.
- Developed reusable Python packages and utilities to simplify project initialization, deployment, and operational processes.
- Managed Linux-based production environments and optimized cloud resources across AWS services including EC2, S3, EFS, and networking components.

Software Engineer | *Full-time*

Sep 2021 – Dec 2022

Gemini Solutions Pvt Ltd

Panchkula

- Diagnosed and resolved batch processing failures, application defects, and platform-related issues to ensure service reliability and operational continuity.
- Managed and resolved client-reported incidents and bugs, ensuring timely communication and effective issue resolution.
- Acted as the primary technical liaison between clients and project teams, facilitating requirement clarification and issue triaging.
- Created and maintained technical documentation detailing debugging methodologies, troubleshooting procedures, and resolution workflows.
- Conducted root cause analyses of production incidents and system bottlenecks, implementing corrective actions to prevent recurrence and improve platform stability.

Associate System Engineer | *Full-time*

Apr 2021 – Sep 2021

Tegstories Pvt Ltd

Bangalore

- Designed and developed software solutions for both internal stakeholders and external clients across multiple business domains.
- Managed application deployment, monitoring, and operational support across cloud-based environments.
- Mentored interns and delivered technical training sessions on software development and industry best practices.
- Collaborated with clients to gather requirements, define project scope, and translate business needs into technical solutions.

Certifications

AWS Certified Cloud Practitioner

Dec 2021

Issued by AWS - Registration ID-423773593

AWS Cloud Technical Essentials

May 2021

Issued by Coursera - <https://coursera.org/share/cae4c1950b1749313ee111e4874aae79>

Programming for Everybody (Getting Started with Python)

May 2020

Issued by Coursera - <https://coursera.org/share/982a69546fb228fa2817817b24c83175>

AWS S3 Basics

May 2021

Issued by Coursera - <https://coursera.org/share/ec46f202d3ac0d862cf688fdff599a5d>
